CAREER OBJECTIVE

I'm seeking an opportunity in a dynamic and creative organization where I can apply the skills I've gained through my education and previous training experience. I'm eager to further develop my creative and technical abilities, contribute to meaningful projects, and continue learning and growing both personally and professionally.

WORK EXPERIENCE

Royal Commission for Jubail and Yanbu – Internship

Yanbu, Saudi Arabia

Jun 2024 – Aug 2024

- Performed maintenance and troubleshooting for computer hardware and printer ensure continuous workflow across departments.
- Handled and responded to technical support requests from employees, resolving issues efficiently.
- Contributed to the development of the Manafaa platform using HTML, CSS, and JavaScript.
- Gained hands-on experience in front-end web development and team collaboration on real-world projects.
- Participated in weekly team meetings to track progress, share insights, and propose solutions to technical challenges.

Luca Miro - Software Engineering

Jeddah, Saudi Arabia (Remote)

Apr 2025 – Jul 2025

- Enhanced user experience by applying responsive and mobile-first design principles across various web projects.
- Developed interactive components using JavaScript frameworks such as React to boost user engagement.
- Applied UX/UI design concepts to raise awareness of user-centric design and its impact on business success.
- Worked with Firebase to create, manage, and connect real-time databases to web applications, improving backend functionality and data handling.

EDUCATION

Bachelor in Computer Science

Taibah University – Yanbu, Madina

May 2025

GPA:4.75/5

DevOps&Cloud Computing Bootcamp

480 Training Hours , Saudi Digital Academy

Nov 2025

PROJECTS

Dermatech - AI-based Dermatology App (Graduation Project) - Team Leader

- Led a team in developing a mobile application that provides initial diagnosis of skin conditions, treatment suggestions, and preventive tips using AI.
- Built the AI model using Google Teachable Machine, enabling fast image classification.
- Designed the full UI/UX of the app and developed the admin interfaces.
- Coordinated team tasks, reviewed project deliverables, and ensured alignment with project goals.
